DICE ID – Technology Platform for Verifiable Credentials

A platform that helps organizations to issue & verify tamper proof digital credentials

Trust Ecosystems

DICE ID enables collaboration networks by establishing trust between the credential issuers and verifiers
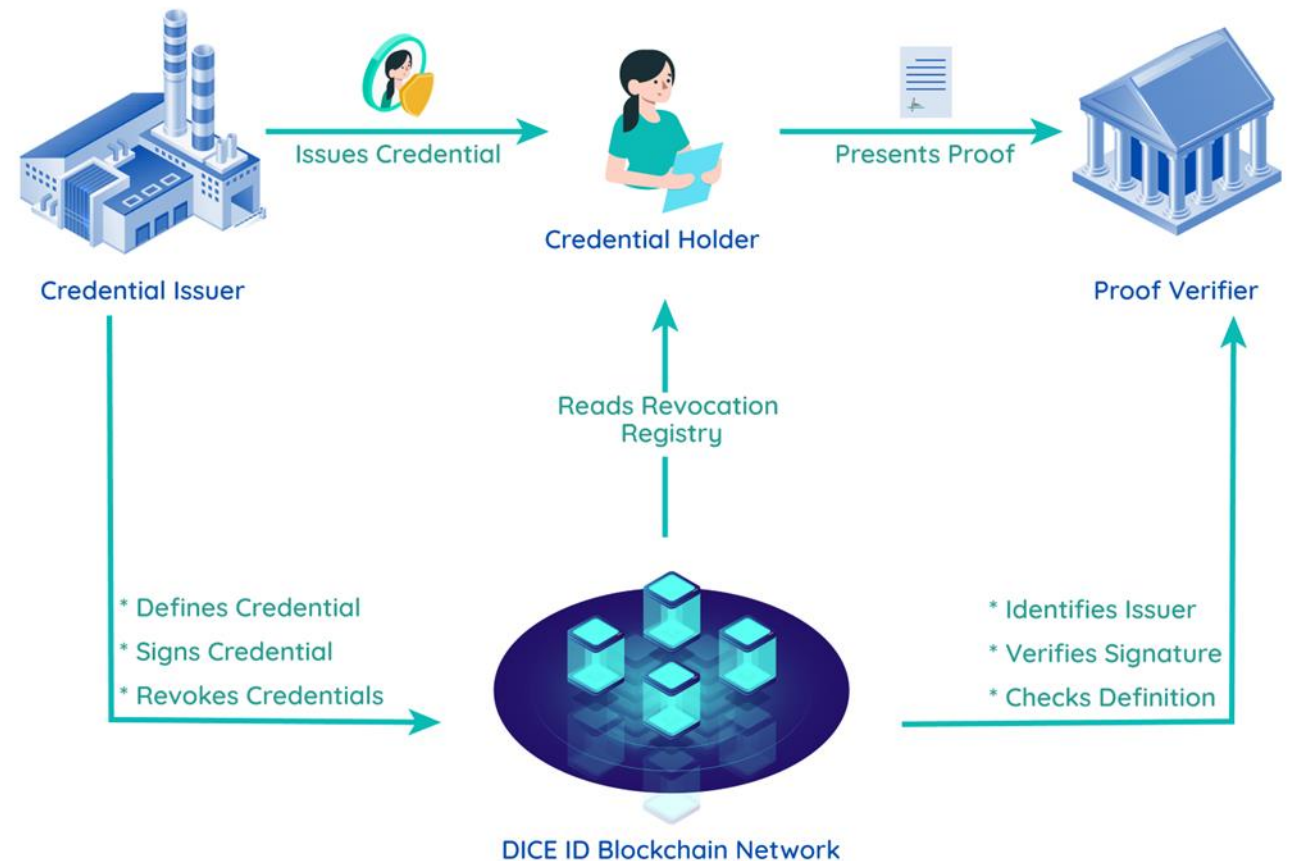

Instant & Cost Effective

Simplified certification, reduce fraud, and enhanced self-verifiable credentials for faster processing and reduced network load.
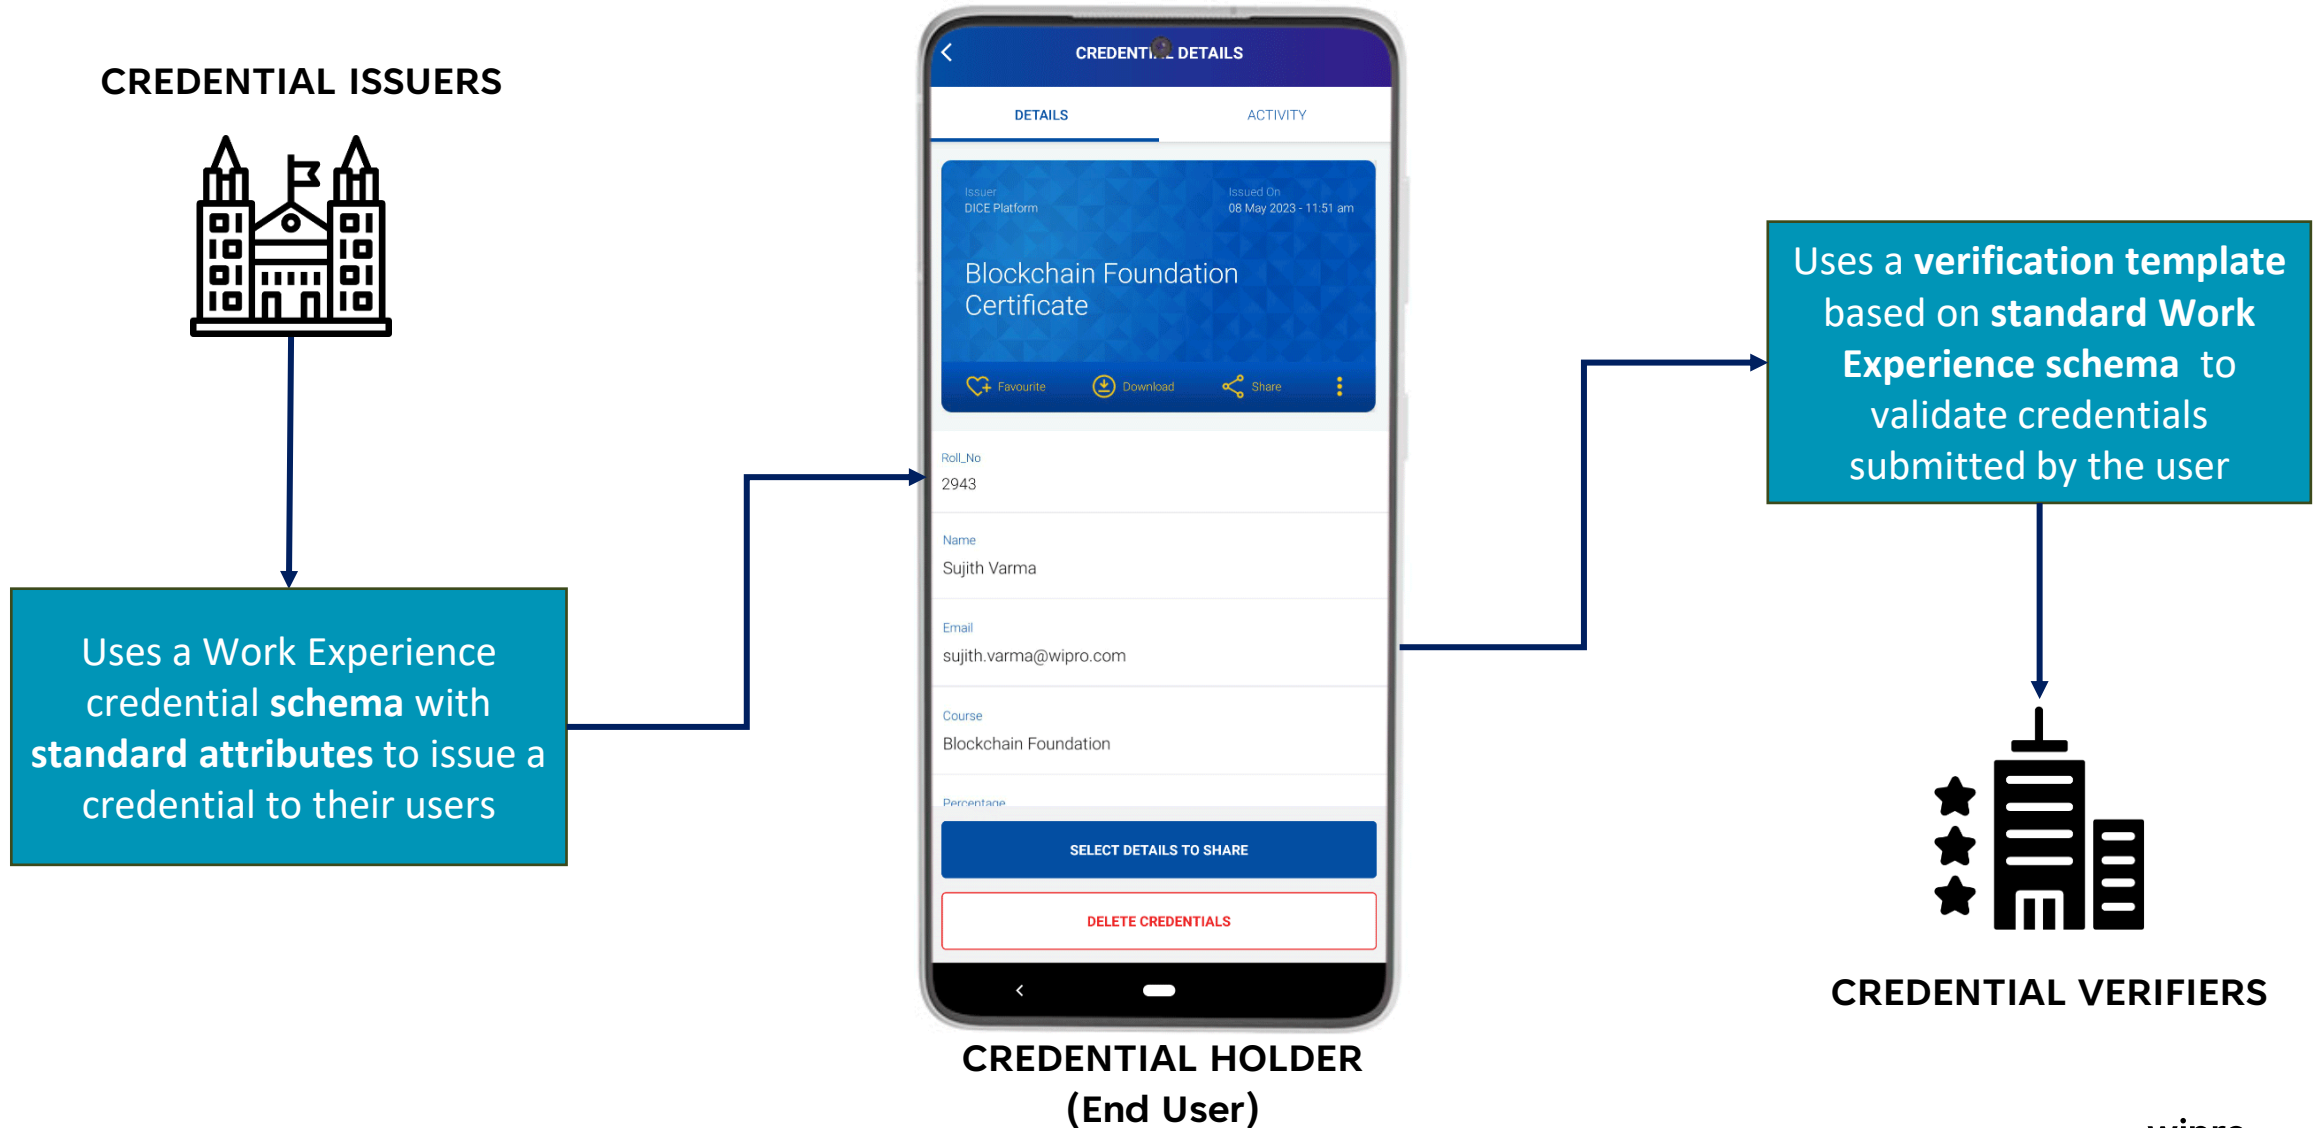

Built on Industry Standards

Based on W3C Verifiable Credentials v1.0 specification. Creates standardized credentials, provides cross industry interoperability.

Privacy Centric & Portable

DICE ID offers unique data privacy compliance with self-sovereign and selective disclosure

Issues Credential

Credential Holder

Presents Proof

Credential Issuer

Proof Verifier

Reads Revocation Registry

* Defines Credential
* Signs Credential
* Revokes Credentials

* Identifies Issuer
* Verifies Signature
* Checks Definition

Need for standardized Schema and Verification Template

CREDENTIAL ISSUERS

Uses a Work Experience credential **schema** with **standard attributes** to issue a credential to their users

CREDENTIAL HOLDER (End User)

Uses a **verification template** based on **standard Work Experience schema** to validate credentials submitted by the user

CREDENTIAL VERIFIERS

wipro

Proposed Work Experience Credential Schema

Attribute	Description
Name	Full name of the individual who worked as employee in the organization
Email	Email address of the employee
Phone	Phone number of the employee
Designation	Last official designation of the employee in the organization
Date of Joining	Start date of employment in the organization
Date of Leaving	Last date of employment in the organization
Employer Name	Name of the organization who provided the employment and has issued the credential
Employer Address	Employer organization's postal address
Employer Email	Employer organization's official email id
Type of Employment	Full time or Part-time employment
Role Description	Brief description of role and responsibilities of the employee in the organization
Comments	Any additional, remarks, contributions, or details relevant to the employment in the organization

Leveraging DICE ID Console for Standard Credentials

1. Sign-up and Sign-in to Platform Console

2. Create / Locate the standardized Work Experience Credential Schema

3. Issue Work Experience Credential

4. Accept Credentials as Credential Holder

5. Create / Locate the standardized Work Experience verification template

6. Submit credentials as proof for verification

Next Steps

1. Provide feedback via email or on https://community.diceid.com – 29th Jan 2024

2. Feedback assimilation and schema refinement

3. Auto-provisioning of standardized work experience schema and verification template in DICE

   ID platform console – 2nd Feb 2024
